

Welcome to Third Grade Summer Assignments

I hope you have a fabulous summer vacation. During your time off, it's important to stay engaged in learning. This summer please choose and complete **10 pages from each section of your Summer Bridge Book**. Each day, you will learn new things while practicing those super important skills you learned in second grade.

Along with the summer bridge book, please go on IXL, it's a great way to relax on those hot summer days. Please go over the multiplication section under the math tab. Start under the third grade tab, then scroll down to the "understand multiplication" section. Please complete E1, E2, E3, E4. After completing these, you can explore other areas as well, maybe you may want to practice your telling time, addition and subtraction or start practicing the multiplication facts. Use IXL to keep your skills sharp and to get a head start on what will be learned in third grade, which will be multiplication.

Lastly, please take time to read! Reading is so important and will give you a head start on your AR in the fall. Please choose one chapter book, use your reading level you left off with at the end of second grade to make your choice. After you are done reading, fill out the attached book report.

Summer Assignment Checklist

- _____ Completed 10 pages from each section of my Bridge book
- _____ Completed Understand Multiplication E1, E2, E3, E4 on IXL
- _____ Read one (maybe more 😊) chapter book
